KONJAC SPONGES

Sponges made of konjac root work perfectly with non-foaming cleanser. Their secret? They are porous and have a high level of water retention. This is how they neutralise acidic substances on the skin.

To promote blood circulation, konjac sponges can be used to achieve a gentle massage effect. Being naturally antioxidant, astringent and exfoliating, they also help reduce melanin production to keep your skin in top shape. They are available with different additives and in different shapes.
