# APPLICATORS

---

- 48 MASCARA – MOLDED BRUSHES
- 50 MASCARA – TWISTED WIRE BRUSHES
- 52 SPECIALS – TREATMENT, STYLING, PRIMER,  
HAIR, EYEBROW
- 54 FIBERS & TREATMENTS
- 56 LIP & SKIN APPLICATORS
- 58 EYELINER & MICRO BRISTLE APPLICATORS

EXTRA VOLUME MASCARA MOLDED BRUSHES

28595 boombasticBRUSH

Ø 9,05 mm

LENGTH 30,65 mm

VISCOSITY medium to high

- 3 giant reservoir zones for boombastic volume
- Spherical brush head for precise application
- Super-soft bristles for infinite length

28958 lashDIVINE

Ø 10,0 mm

LENGTH 30,7 mm

VISCOSITY medium

- Bi-injected Sandwich technology
- Mix of shorter and longer bristle rows for maximum volume and definition at the same time
- Bristles on the tip for easily reworking and reaching of tiny lashes

VOLUME & CURL MASCARA MOLDED BRUSHES

281022 burlesqueBEAUTY

Ø 8,75 mm

LENGTH 27,0 mm

VISCOSITY medium

- Slightly woman-shape for extra push-up effect
- Bristles at the tip for easily reworking and definition
- Special gaps between the bristle rows act as volume reservoirs

28116 lashSTYLIST

Ø 7,9 mm

LENGTH 25,6 mm

VISCOSITY medium to high

- Reservoir zones on the flat sides
- Conical tip of the brush enables convenient application in the corner of the eyes
- Perfectly separated lashes due to bristle configuration

28243 flexiQUEEN

Ø 7,8 mm

LENGTH 26,0 mm

VISCOSITY medium to high

- Two separate application zones
- Short bristles enable great bulk deposit for perfect volume
- Long bristles push the lashes upwards

28652 missCURL

Ø 7,1 mm

LENGTH 25,5 mm

VISCOSITY medium to high

- Slightly curved brush shape for breathtaking curl
- Soft bristles for an astonishing fan-out effect
- Precise separation without clumping

28865 lashGLORY

Ø 7,4 mm

LENGTH 29,7 mm

VISCOSITY medium to high

- Wedge-shaped discs and conical bristles for optimal application
- Bristles at the tip for an extra push-up effect
- Triangular brush core for improved deposit and pay-off

281042 brilliantEYES

Ø 8,0 mm

LENGTH 25,5 mm

VISCOSITY medium to high

- Bi-injected Sandwich technology
- Designed for a XXL volume effect and immediately lash curling
- With its curved shape it perfectly adapts to the lash line and coats every lash in an instant

VOLUME & LENGTHENING MASCARA MOLDED BRUSHES

28113 twicePRECISE

Ø 6,5 mm

LENGTH 25,8 mm

VISCOSITY low to medium

- Two different looks in one applicator
- Side A for perfectly lengthened lashes
- Side B for great volume

28123 magicDEFINER

Ø 7,5 mm

LENGTH 25,6 mm

VISCOSITY low to high

- Fast application due to the bristles shape and its easy penetration
- Separates each lash for a full, fan-like effect
- Easy application due to the conical shape

28413 push-upBRUSH

Ø 8,5 mm

LENGTH 27,5 mm

VISCOSITY medium to high

- Horizontal and vertical bristles for simple, precise application
- Bristles at the tip for an extra push-up effect
- Fantastic pay-off

28544 volumaticBRUSH

Ø 4,5 mm

LENGTH 26,4 mm

VISCOSITY low to medium

- Super soft and flexible bristles
- Special bristle configuration for improved application
- Gorgeous volume and lengthening effect

VOLUME & SEPARATION MASCARA MOLDED BRUSHES

28302 softSTAR

Ø 7,5 mm

LENGTH 25,6 mm

VISCOSITY low to medium

- Mixture of long and short bristles for fantastic volume and enhanced separation
- Short bristles collect and deliver the bulk
- Long bristles comb and distribute the bulk evenly

28964 softSECRET

Ø 8,0 mm

LENGTH 25,5 mm

VISCOSITY medium

- Bi-injected Sandwich technology
- Two application zones for unbelievably defined volume
- Zigzag bristles push the hairs upwards and serve as bulk reservoir

281051 pureDEFINITION

Ø 7,2 mm

LENGTH 27 mm

VISCOSITY medium

- Bi-injected Sandwich technology
- Slight hour-glass shape is perfectly adapted to the lash line
- Alternate rows of bristles and discs create defined volume

ALL IN ONE MASCARA MOLDED BRUSHES

28349 attractEXACT

Ø 5,94 mm

LENGTH 20,0 mm

VISCOSITY all

- Short bristles work magically on tiny lashes
- Precise application without smearing or clumping
- Fast and adequate pay-off

TREATMENT

311548 arcticEYES

Ø 7,0 mm  
LENGTH 24,5 mm

- Classical shape for reliable bulk application
- No clumping due to EOS2K fibre with stiffer core and softer exterior surface
- Pointed brush tip for exact application

311163 hybridBRUSH

Ø 8,0 mm  
LENGTH 25,4 mm

- Mix of fibers for optimal results
- Polyester fibers absorb and transport the treatment nicely onto the lashes
- GEKA's EOS fiber combs and separates the lashes

311166 softBRUSH

Ø 7,0 mm  
LENGTH 25,4 mm

- Extra soft fibers for smooth application
- Convenient shape for defined and super long lashes
- Bristle softness works magically on tiny lashes

311273 lashTWIST

Ø 8,0 mm  
LENGTH 25,0 mm

- Convenient, twisted helix-shaped brush
- fibreDREAMS™ fiber with innovative eyelets
- Improved formula pick-up and application

311627 lashLOVE

Ø 8,0 mm  
LENGTH 26,0 mm

- sunshineFIBER™ with its grooves provides great volume results
- Also the 5 grooves of the patented HYPNO cut act as bulk reservoir zones
- SEPA treated fiber tips separate the lashes

28388 Glamour Touch Brush

Ø 4,2 mm  
LENGTH 25,65 mm

- Extraordinary screw-like shape
- Fast, precise application
- Developed for treatment and glitter formulations

STYLING

311589 simplySPARKLE

Ø 7,0 mm  
LENGTH 26,0 mm

- Conical brush shape with a closed surface
- Innovative EOSbombyx fiber in 6 mils
- Thanks to its shape and size it easily also reaches tiny lashes

311256 gorgeousGODDESS

Ø 9,0 mm  
LENGTH 26,0 mm

- EOS fiber with irregular surface
- Patented HYPNO 4-edge cut for maximum volume
- hybrITION technology for extra-fast pay-off

311665 stunningLOOK

Ø 7,5 mm  
LENGTH 26,0 mm

- A classic cylindrical conical shaped brush that has 2 special features:
- Patented HYPNO cut with long and short bristles
- EOSbombyxgreen fiber with 3 benefits in 1

311313 wonderSTYLIST

Ø 8,0 mm  
LENGTH 26,0 mm

- Easy to handle
- Combination of comb and brush
- Precise shape for exact application

311314 mermaidLOOK

Ø 10,0 mm  
LENGTH 26,0 mm

- Asymmetrical ball cut for extra push
- Convenient application on shorter lashes
- EOS volume fiber

311325 velvetCURVE

Ø 7,9 mm  
LENGTH 25,0 mm

- fibreDREAMS™ fiber
- Especially rich formula application
- Extra combing zone for easier application

SPECIALS

PRIMER

311499 cuteGIANT

Ø 7,0 mm  
LENGTH 26,0 mm

- A brush with a classic shape
- Thanks to the cylindrical and conical part all lashes can be reached easily
- greenlineFIBER made of the castor oil plant

311666 heavenlyEYES

Ø 7,5 mm  
LENGTH 26,0 mm

- The brush looks very classic due to its shape and size
- But its secret is its EOSfoam-greenFIBER
- A sustainable fiber with a sponge-type surface that easily absorbs and applies formulas

311171 temptingEYES

Ø 7,0 mm  
LENGTH 26,0 mm

- HYPNO cut creates a distinctive cross section with 4 edges
- fibreDREAMS™ fiber
- Wing-like loops for optimum formula absorption and application

311566 volumeDESIGNER

Ø 8,5 mm  
LENGTH 26,0 mm

- A conical shaped brush
- Convenient and defined application
- Innovative sunshineFIBER™ with imposing fiber profile serves as real volume-booster

311617 lashFLASH

Ø 7,0 mm  
LENGTH 26,0 mm

- A cylindrical brush with a conical tip
- Patented HYPNO cut with 3 volume and 3 separation zones
- Bio-based greenlineFIBER made of the castor oil plant

311242 daringLOOK

Ø 7,0 mm  
LENGTH 25,0 mm

- SIAM shape allows extra volume reservoir
- Long and short bristles can be distributed individually
- Conical tip enables convenient application

SPECIALS

HAIR

28113 twicePRECISE

Ø 6,5 mm  
LENGTH 25,8 mm

- 2 finishes with just 1 applicator
- Side A with big, wide-spread bristles for highlights with intensive color and big color straights
- Side B with denser, thinner bristles for fine and natural highlights

REGISTERED DESIGN

28116 lashSTYLIST

Ø 7,9 mm  
LENGTH 25,6 mm

- A molded applicator with 2 application zones
- The flat side acts as a bulk reservoir
- The mix of longer and shorter bristles on the other side evenly distributes the formula by combing the hair

28544 volumaticBRUSH

Ø 4,5 mm  
LENGTH 26,4 mm

- A molded applicator in comb shape for maximum precision
- Its slim, long design ensures easy handling
- Fast and adequate formula delivery

311287 greenQUEEN

Ø 8,0 mm  
LENGTH 26,0 mm

- Sustainable plant-based greenLINE fiber
- Impressive hair combing
- Even & streak free coloration as the fiber does not spread its ends

311610 delicateDESIGNER

Ø 7,5 mm  
LENGTH 25,0 mm

- A fiber brush for great hair coloration results
- The EOSbombyx fiber with its notches on the surface grabs the hair gently
- Reliable combing and even color finish thanks to the stiff fiber

311613 matchlessBRUSH

Ø 7,5 mm  
LENGTH 25,0 mm

- Express application due to the EOSFoam fiber
- The fiber's softer, foamed outer shell absorbs plenty of formulation
- The stable core of the fiber combs the hair and distributes the bulk evenly

HAIR

EYEBROW APPLICATORS

31346 prettyPERFORMER

Ø 7,5 mm  
LENGTH 25,4 mm

- Easy to comb, pleasant to apply
- Eye-catching „drop“ shape
- Defines eyelashes and brows

311539 sweetSIN

Ø 6,8 mm  
LENGTH 26,0 mm

- An asymmetrical brush with two application functions:
- Shorter bristles comb eyebrows, pointed tip defines the fine brow ending
- EOSfoam fiber is extra gentle to brows and the skin underneath

311167 volumePERFORMER

Ø 10,0 mm  
LENGTH 25,0 mm

- Eye-catching brush shape
- Stiff fiber for great combing effect
- Tames even the most stubborn eyebrows

311286 petitePERFECTION

Ø 5,0 mm  
LENGTH 14,0 mm

- Micro brush for precise application
- fibreDREAMS™ fiber
- Wing-like loops for optimum formula absorption and application

28905 miniPERFECTOR

Ø 4,2 mm  
LENGTH 14,0 mm

- Easy application thanks to the size and shape of the 1K-applicator
- Optimal brow combing thanks to the brush configuration
- Perfect dosing of the formula

311538 petitePOWER

Ø 6,5 mm  
LENGTH 15,0 mm

- Eye-catching nano-brush coats even the tiniest hairs
- fibreDREAMS™ fiber
- Extra small diameter and shape for exact brow definition

EYEBROW

311342 browMOTION

Ø 10,0 mm  
LENGTH 16,0 mm

- Conical brush shape for precise application
- EOS fiber with irregular surface
- Semi-closed brush surface is ideal for fiber formulations

314021 flawlessBROW

Ø 6,5 mm  
LENGTH 15,0 mm

- Small brush with an asymmetrical cut
- Long bristles comb the brows, short bristles define and shape them
- Soft fiber does not stitch

311554 browDREAM

Ø 5,0 mm  
LENGTH 13,0 mm

- Conical nano-brush to catch the brow contour
- 1-step brow finish due to the properties of extraordinary sunshineFIBER™
- Pointed tip for exact accentuating of the brow shape

311555 prettyBROW

Ø 6,0 mm  
LENGTH 13,0 mm

- Mini brush for brow treatment
- Slim brush size for maximum precision
- Innovative sunshineFIBER™ with volume reservoirs for brow finish in one stroke

311556 browLOVE

Ø 5,0 mm  
LENGTH 21,0 mm

- Extraordinary sunshineFIBER™ with 10 grooves that act as special volume reservoir
- Small brush size for precise application
- Easy to comb, pleasant to apply

311645 awesomeBROW

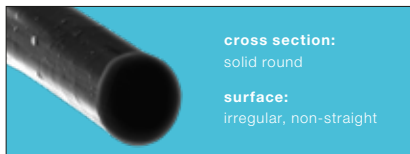

Ø 7,0 mm  
LENGTH 17,0 mm

- A small conical brush for a convenient application
- Accurate shaping, filling and defining of eyebrows
- Sustainable EOSgreen fiber in 5 mils

 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular, non-straight</p>	<b>EOS FIBER</b>	 <p><b>cross section:</b> solid round, hard PBT core</p> <p><b>surface:</b> irregular, non-straight, soft TPE</p>	<b>EOS 2K FIBER</b>	 <p><b>cross section:</b> solid triangular</p> <p><b>surface:</b> irregular, non-straight</p>	<b>EOSdelta FIBER</b>
<ul style="list-style-type: none"><li>· A classic round PA 6.12 fiber with a solid cross section.</li><li>· The secret of this fiber is its irregular surface: This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· The properties of the fiber create a closed surface of the brush.</li><li>· This effects a dosed delivery of the bulk with every single stroke.</li><li>· EOS fiber ensures very good separation. The stronger the fiber is, the better separation can be achieved.</li><li>· Available in different colors and strengths.</li></ul>		<ul style="list-style-type: none"><li>· A solid round fiber made of 2 materials PBT and TPE.</li><li>· The brush core is made of hard PBT material: it gives the fibers the necessary stability to comb and penetrate the lashes.</li><li>· The hard core is surrounded by soft TPE material on the surface. It absorbs the formula very well and applies it to the lashes easily.</li><li>· Thus, this fiber can create volume and feels very soft without stitching on the eyelid.</li><li>· The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Available in different colours and strengths upon request.</li><li>· Patented in combination with SEPA treatment.</li></ul>		<ul style="list-style-type: none"><li>· The secret of this fiber is the irregular surface a typical EOS characteristic. This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Special feature is the triangular cross section: Thanks to its triangular shape, the edges of the EOSdelta fiber separate the eyelashes perfectly.</li><li>· The result: a great fiber for great separation effects which can even be enhanced with SEPA fiber treatment.</li><li>· Available in different colors and strengths.</li></ul>	

 <p><b>cross section:</b> solid triangular, hard PBT core</p> <p><b>surface:</b> irregular, non straight, soft TPE</p>	<b>EOSdelta2K FIBER</b>	 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular with notches</p>	<b>EOSbombyx FIBER</b>	 <p><b>cross section:</b> solid round, hard PBT core</p> <p><b>surface:</b> irregular with notches, soft TPE</p>	<b>EOSbombyx2K FIBER</b>
<ul style="list-style-type: none"><li>· Secret #1 of this fiber is the irregular surface a typical EOS characteristic. This is what makes it possible to pick up plenty of the formula and apply it just as quickly. The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Secret #2 is that the fiber is made of to two components: the core is made of a harder material (PBT) than the outside (TPE). The stable core provides the necessary stability to comb the eyelashes, while the soft outside surface ensures a very soft application feeling, absorbs the formula very well and applies it to the lashes easily.</li><li>· It is a real separation star: The stable core combined with the triangular shape of the fiber edges separate the lashes perfectly.</li><li>· Patented in combination with SEPA treatment.</li></ul>		<ul style="list-style-type: none"><li>· A real volume booster due to the properties of the fiber.</li><li>· The irregular fiber surface - a typical EOS property - enables fantastic pick up as well as quick and plenty transportation of the formulation.</li><li>· The notches in the fiber's surface act as ideal bulk reservoir and provide great volume results.</li><li>· The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Conjures up maximum volume and extra long eyelashes.</li><li>· Works heavenly with fiber formulations.</li><li>· Available in different colors and strengths.</li></ul>		<ul style="list-style-type: none"><li>· A fiber with a solid round cross section that combines 3 features in 1: EOS, bombyx and 2K.</li><li>· EOS stands for a fiber with an irregular surface. This is what makes it possible to pick up plenty of the formula and apply it just as quickly. The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Bombyx describes the additional notches on the fiber surface: They act as a bulk reservoir zone and also catch the lashes.</li><li>· 2K refers to the two component material: the yellow fiber core made of harder PBT material is surrounded by soft TPE material which absorbs the formula very well and applies it to the lashes easily. Thus, the fiber remains soft and does not stitch on the eyelids.</li><li>· Patented in combination with SEPA treatment.</li></ul>	

 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular, sponge type</p>	<b>EOSfoam FIBER</b>	 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular, non straight</p>	<b>EOSgreen FIBER</b>	 <p><b>cross section:</b> solid triangular</p> <p><b>surface:</b> irregular, non straight</p>	<b>EOSdelta green FIBER</b>
<ul style="list-style-type: none"><li>· Great volume booster due to the properties of the fiber.</li><li>· The irregular fiber surface a typical EOS property enables fantastic pick up as well as quick and plenty transportation of the formulation. The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Foam stands for an innovative fiber that avoids any hurting or stinging during the application due to the sponge like outer shell that is super pleasing to the eye for a ultra softly application feeling. The additional grooves on the surface of the brush act as an ideal bulk reservoir and transport plenty of the formula to the eyelashes for an extra volume effect.</li><li>· Ensures great volume, lash separation and lengthening results.</li></ul>		<ul style="list-style-type: none"><li>· A round PA 10.10 fiber with a solid cross section.</li><li>· The secret #1 of this fiber is its irregular surface: This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· The properties of the fiber create a closed surface of the brush. This effects a dosed delivery of the bulk with every single stroke.</li><li>· Secret #2: The fibre is made from 100% renewable raw material from the castor oil plant.</li><li>· EOS fiber ensures very good separation. The stronger the fiber is, the better separation can be achieved.</li><li>· Available in different colors and strengths.</li></ul>		<ul style="list-style-type: none"><li>· This fiber combines 3 features in 1: EOS, delta and green.</li><li>· EOS stands for a fiber with an irregular surface. This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· Delta describes the cross section of the fiber. In this case it is delta shaped: The edges of the triangle separate the eyelashes perfectly to avoid clumping.</li><li>· Green refers to the material: It is made from 100% renewable raw material from the castor oil plant.</li><li>· A clever sustainable fiber solution for twisted wire brushes with maximum performance.</li></ul>	

 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular with notches</p>	<b>EOSbombyx green FIBER</b>	 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> irregular, sponge type</p>	<b>EOSfoam green FIBER</b>	 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> smooth</p>	<b>greenline FIBER</b>
<ul style="list-style-type: none"><li>· A fiber with a solid round cross section that combines 3 features in 1: EOS, bombyx and green.</li><li>· EOS stands for a fiber with an irregular surface. This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· Bombyx describes the additional notches on the fiber surface: They act as a bulk reservoir zone and also catch the lashes.</li><li>· Green refers to the material: It is made from 100% renewable raw material from the castor oil plant.</li><li>· A clever sustainable fiber solution for twisted wire brushes with maximum performance.</li><li>· Works heavenly with fiber formulations.</li></ul>		<ul style="list-style-type: none"><li>· This fiber combines 3 features in 1: EOS, foam and green.</li><li>· EOS stands for a fiber with an irregular surface. This is what makes it possible to pick up plenty of the formula and apply it just as quickly.</li><li>· Foam stands for an innovative fiber that avoids any hurting or stinging during the application due to the sponge like outer shell that is super pleasing to the eye for a ultra softly application feeling. The additional grooves on the surface of the brush act as an ideal bulk reservoir and transport plenty of the formula to the eyelashes for an extra volume effect.</li><li>· Green refers to the material: It is made from 100% renewable raw material from the castor oil plant.</li><li>· A clever sustainable fiber solution for twisted wire brushes with maximum performance.</li></ul>		<ul style="list-style-type: none"><li>· It is a solid, round PA 10.10 fiber.</li><li>· The surface of the fiber is smooth.</li><li>· The fiber is made from 100% renewable raw material from the castor oil plant.</li><li>· The properties of the fiber create an open surface, which makes the penetration of the lashes into the brush easier.</li><li>· It is a typical volume fiber, because while twisting the brush, the fibre does not spread the ends. This creates an open surface.</li></ul>	

 <p><b>cross section:</b> triangular with 3 eyelet</p> <p><b>surface:</b> smooth</p>	<b>fiberDREAMS™</b>	 <p><b>cross section:</b> solid round with 10 grooves</p> <p><b>surface:</b> irregular, notches, fine micro structure</p>	<b>sunshine FIBER™</b>	 <p><b>cross section:</b> solid round</p> <p><b>surface:</b> smooth</p>	<b>SOLIDRound FIBER</b>
<ul style="list-style-type: none"><li>· This soft polyamide fiber helps dreams take flight.</li><li>· With its extraordinary cross section and 3 wing shaped eyelets, fibreDREAMS™ lifts mascara application into higher realms.</li><li>· The fiber is a real goddess when it comes to picking up and applying the formula thanks to the reservoir zones between the eyelets.</li><li>· With total ease, it conjures up great volume, perfect separation, and long lashes.</li></ul>		<ul style="list-style-type: none"><li>· Extraordinary fiber cross section reminds of the sun.</li><li>· With 10 grooves between the sunrays, this fiber has the highest amount of formulation reservoirs compared to any other fiber for ultra volume.</li><li>· Fantastic pick up and transportation of the formulation.</li><li>· Perfectly usable for brushes used for mascara, eyebrow and hair.</li><li>· Patent pending combination of brushes and fiber.</li><li>· Available in 3 different strengths and 3 different degrees of hardness.</li></ul>		<ul style="list-style-type: none"><li>· It is a solid, round PA 6.12 fiber.</li><li>· The surface of the fiber is smooth.</li><li>· The properties of the fiber create an open surface, which makes the penetration of the lashes into the brush easier.</li><li>· This fibre is a typical volume fiber, because while twisting the brush, the fiber does not spread the ends. This creates an open surface what makes the lashes easier to fall into the gaps, where the bulk is deposited inside, and thus more bulk can be transported onto the lashes.</li><li>· Available in different colors and strengths.</li></ul>	

 <p><b>SIAM TECHNOLOGY</b></p>	 <p><b>SEPA TECHNOLOGY</b></p>	 <p><b>HYBRITON TECHNOLOGY</b></p>	 <p><b>HYPNO TECHNOLOGY</b></p>
<p>Especially precise mascara applications are promised by our patented SIAM brush cut: special vertical volume zones on the brush absorb more mass and give a targeted application to the lashes. A feature that makes SIAM brushes interesting for immediately ultra-volume effect. The production process developed by us also offers considerable potential for individualization, depending on the desired application result the arrangement of longer and shorter bristles can be freely combined. A real eye-catcher in both senses of the word!</p>	<p>Maximum volume, quicker application, no clumping and perfect combability of lashes – our SEPA technology makes it possible. In this process, the ends of the bristle fibers, which are normally rough and cut off flat, are ground to a wedge shape. A special production process that optimizes each twisted wire brush to the max and transforms it into a real miracle of separation.</p>	<p>Saturated volume with our hybriTION technology! An ingenious trick: a combination of innovative fiber and ultra-thin film coating. This is wrapped around the inner wire thereby creating a reservoir. The glassy surface of the film transports the mascara from the brush directly to the lashes – without wastage and in a single application.</p>	<p>More profile for more volume: the HYPNO cut conjures up an unmistakable brush profile and can feature up to eight cut edges. The horizontal brush grooves that this creates can absorb an increased volume of mascara. And while long bristles ensure a reliable separation of lashes, the shorter bristles intensify the lash volume with each application.</p>
